Flo E, Garcés E, Manzanera M, Camp J (2011) Coastal inshore waters in the NW Mediterranean: physicochemical and biological characterization and management implications. *Estuar Coast Shelf Sci* 93:279–289

Percentual nutrient supply in the coastal zone

Tendency of the nutrient inputs in the Mediterranean Sea

Mediterranean rivers suffer from a significant reduction in freshwater discharge (20 %, 1960- 2000)

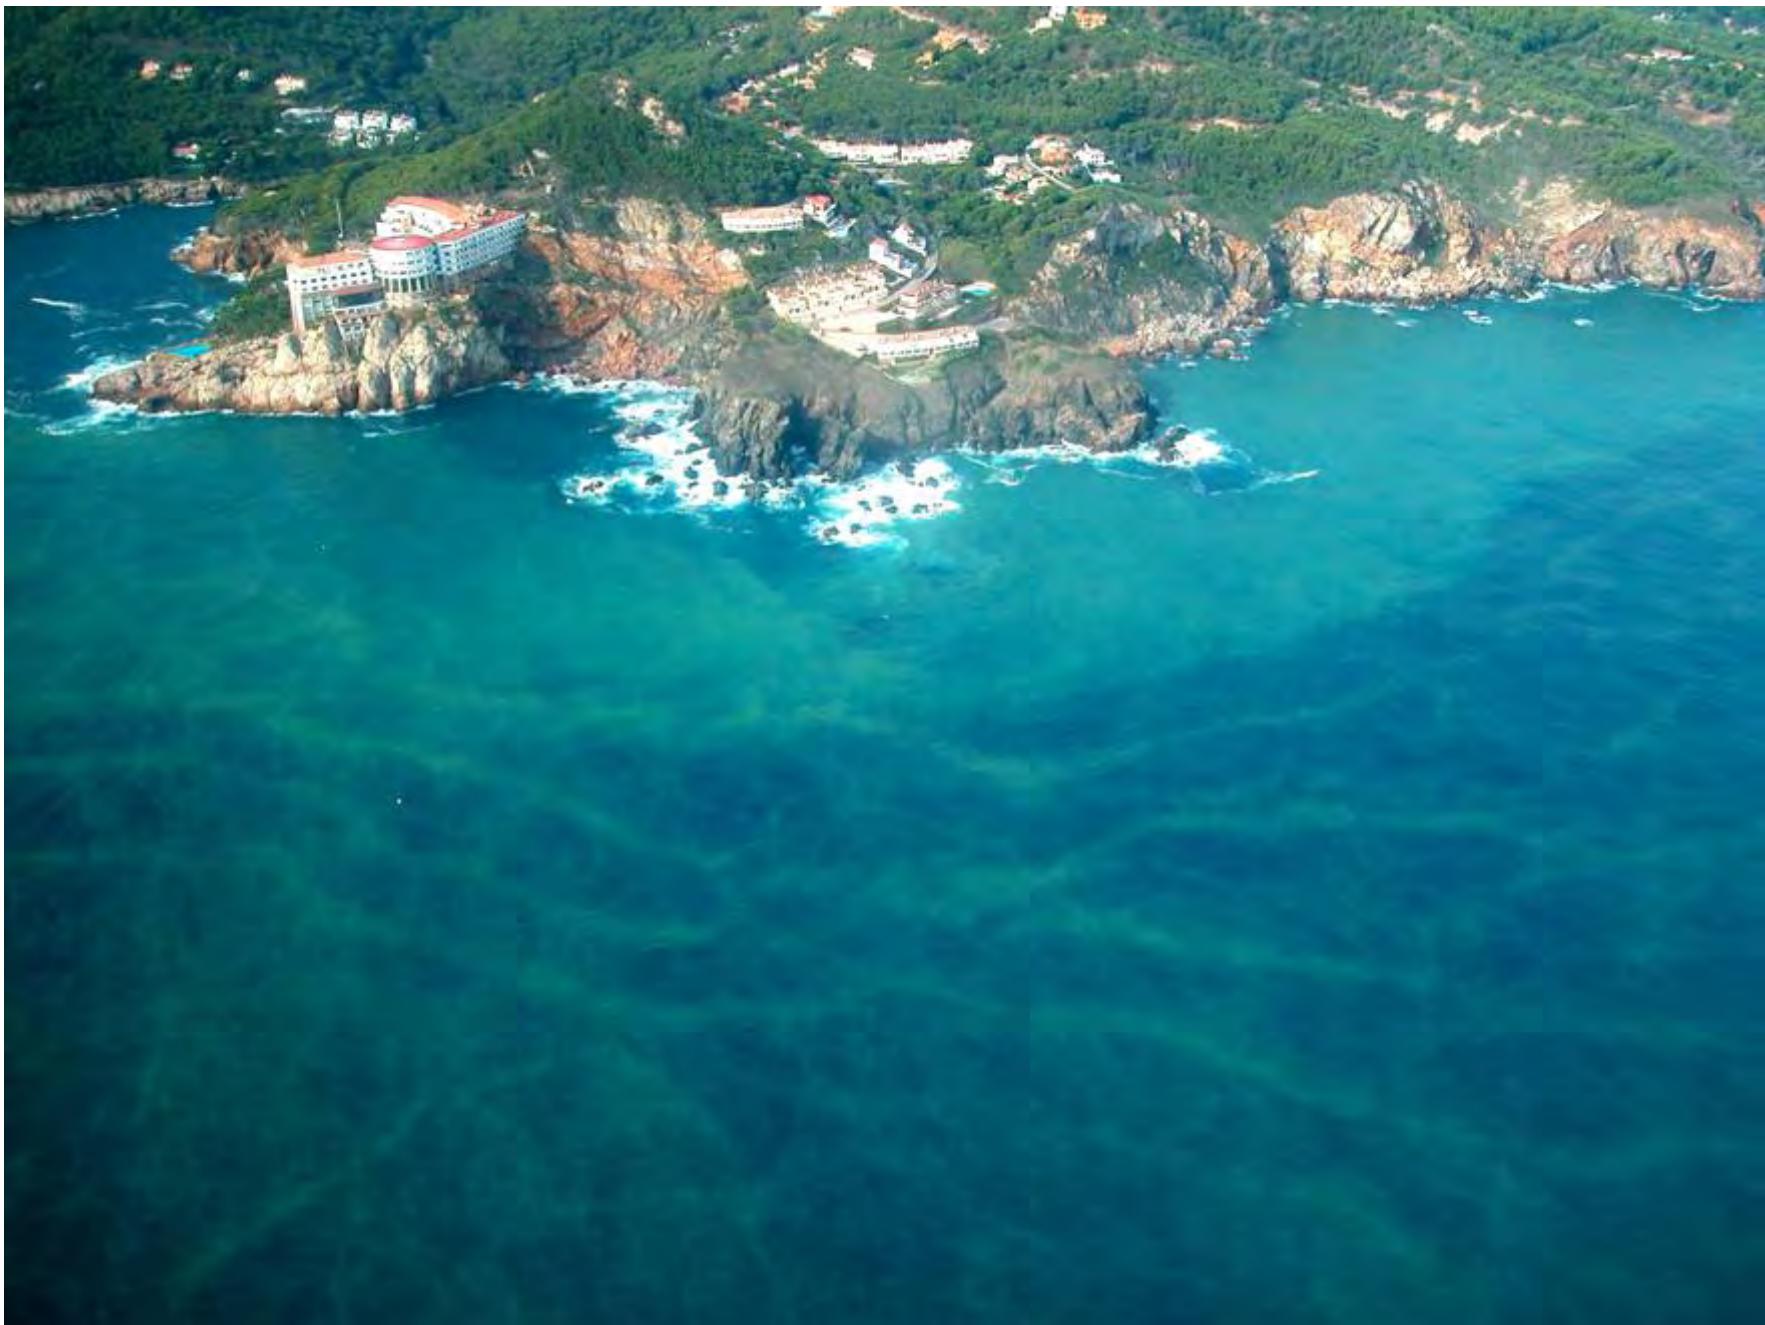

A similar decrease has been observed for the fluxes of dissolved silica butwhat are the dynamics in the fluxes of N and P?

Ludwig et al. 2009
